

# How to Spot a Phishing Email

## Generic subject line

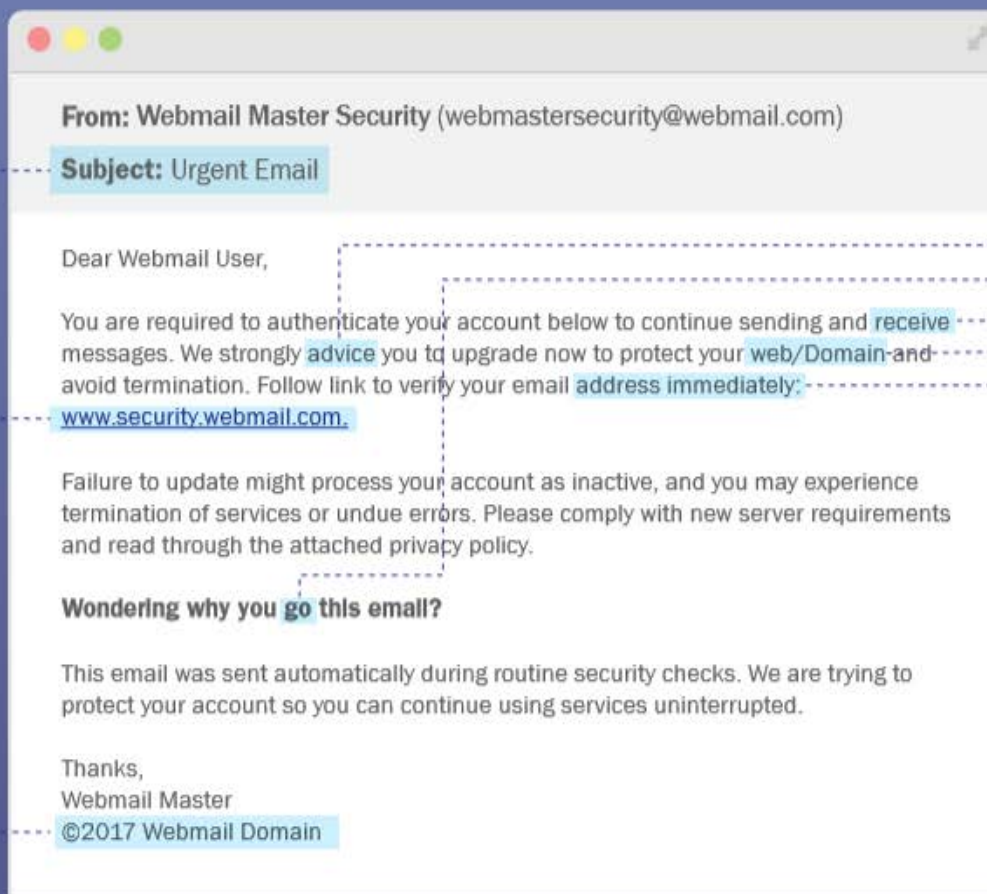

Legitimate emails usually have detailed subject lines. A vague subject line can be a key indicator of a phishing scam.

## Suspicious URL

Hover over links included in emails to see the actual destination of the URL.

## Improper use of copyright

Watch for improper use of copyright information. This is used to make the phishing email look official.

## Bad grammar/spelling

Phishing emails often contain misspelled words and bad grammar. This is a sign that the email did not come from a professional organization or a real person you may know.

## Unnecessary urgency

Use your intuition and if something 'feels' wrong, consider calling the organization or office directly to validate the email.
